- FAQ

# Requirements

## YOU WILL NEED

• Computer with Windows® system (no tablets or mobile devices);

### Windows – System Requirements

- Windows 7 SP1 or newer, Microsoft .NET 4.5 (included)
- 1024 x 768 display, USB port and 1 GB RAM
- May require up to 20 GB free disk space
- USB drive

#### USB drive specification should be as followed:

- FAT32 formatted USB flash drive (NTFS NOT supported)
- USB2.0 (USB3.0 support is NOT guaranteed)
- 4 GB or higher (up to 32GB)
- High-speed internet access

# PREPARE MEDIA $\square \rightarrow \bigoplus$

## 1. Format a USB drive.

Follow these steps to prepare and format USB drive:

- 1) Insert your USB drive into the appropriate slot on your computer
- 2) Right click on the USB drive icon
- 3) Select Format
- 4) For File System, select FAT32
- 5) Select Start

# PREPARE MEDIA $\square \rightarrow \blacksquare$

2. Use the ignition system to turn on vehicle and tap **OK** on the "Caution" screen. Insert your USB drive into the appropriate slot on your infotainment system.

Refer to your vehicle's owner manual for the location of the USB drive slot.

### Insert USB Drive

# PREPARE MEDIA $\Box \rightarrow \bigoplus$

3. Select Settings > About > Software Update.

4. Select **Set up USB Drive**. Your Infotainment System will display "Set up completed", Select **OK** and remove the USB drive.

1. Open **Garmin Updater** (Launcher.exe) on your computer. Garmin Updater is free desktop software for updating Garmin devices.

https://download.garmin.com/asia/download/PCSyncTool/SW/ToyotaSEA/launcher.exe

2. Connect USB drive to your computer, and wait for it to be detected, then tap **OK**.
